@alexmiberry @alexelcu @hmemcpy Yeah having ZIO you can benefit of Green threads with Fibers. But Async in kotlin is superb is like Loom. **Scala** is IMHO better. But I also like Kotlin very much, and I like to have different project in each technology. In Kotlin we don't have ZIO/Monix/Cats, but...

@politrons @alexelcu @hmemcpy I like both languages a lot. The thing I miss the most when I write **Scala** are coroutines and Flows. **Scala** does similar things with libraries (Monix, ZIO, Cats-Effect/fs2, etc). I go back and forth whether I like language support or library support better.

The multi-faceted nature of these challenges mean that F[...], despite all its drawbacks, is probably a local maxima for tagless-final in **Scala**. Which sucks for TF developers who would benefit from context & typed errors.
